Selecting Files

Clicking the **Add** icon the number of the standard file browse and select window. From that window you can navigate to the folder and find the files you want to add to the list of video files to be worked.

Alternatively, if you are using Windows Explorer to locate files, you have the convenience of being able to 'drag and drop' files into the document window.

Boxoft AVI Converter even allows you to select all files in a particular directory/folder by using the **Add Folder** button! Adding a directory also supports sub-folders.

Each added video file is displayed in the document list window.
