Using BOXOFT SCREEN OCR

BOXOFT SCREEN OCR can be started either by launching the application via a desktop shortcut, or directly from within Windows/Windows Explorer.

When you start the program, you will be presented with the primary screen from which all actions are taken.

This small article will guide you through the entire Boxoft Screen OCR operation cycle, focusing on step-by-step procedures description. This Quick Start guide presupposes you have Boxoft Screen OCR application installed and run it for the first time. If you need more information on how to install Boxoft Screen OCR, click here.

Step 1: Run Screen OCR

You should see the checkbox on the last installation wizard screen named 'Start application'. By default it is checked, so if you press Finish, Screen OCR will start. If you have un-checked this box, you may start the application manually by selecting Start->Programs->Screen OCR->Screen OCR. Once the application starts, you will see its icon in the Task Tray notification area (near the system clock).

Step 2: Choose the Screen Selection

Click the [Capture] **icon** button to Capture Screen and OCR to editable text.

Step 3: Choose clipboard format and copy text/graphics
The easiest way to copy recognized text to clipboard is to select the topmost item from the toolbar- Copy.

Ending Your Session
When you have completed your work, choose the **File** option and select **Exit** from the dropdown list.
